**Restriction Requirement**

Restriction to one of the following inventions is required under  
35 U.S.C. 121:

Group I, claims 1-24 and claims 26-50 (in part), drawn to method for  
identifying compounds, classified in class 702, subclass 19.

Group II, claim 25 and claims 26-50 (in part), drawn to method for making  
expression products, classified in class 435, subclass 91.21.

Group III, claims 51-57 , drawn to hybridization system, classified in class  
536, subclass 23.1.

The inventions are distinct, each from the other because of the following  
reasons:

The inventions listed as Groups I, II do not relate to a single general inventive  
concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or  
corresponding special technical features for the following reasons: Each of the  
Groups claims a separate and unrelated method - Gr. I - a method for identifying  
compounds; Group II - a method for making expression products. Each method  
contains specific and unique method steps which are not shared by another method

Art Unit: 1631

and each method has a unique outcome. Thus, groups I, II do not share a corresponding special technical feature.

Inventions I and II are related as independent and/or patentably distinct methods as they have different effects and different functions (Gr. I - a method for identifying compounds; Group II - a method for making expression products).

The product of Group III is unrelated to method for identifying compounds of Group I, or method for making expression products of Group II as it is not explicitly used in these methods.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if

one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
